ASSEMBLE

PREPARE

Connect garden hose (non-supplied) and water supply. Let the water run through the hose and turn it off.

Install the inlet male connector, connect garden hose and inlet connector, and turn the water on.

Makes sure the ON/OFF switch is in the OFF position.

Unlock the safety trigger on the spray gun and press the trigger to pull the water through the machine, until a steady stream of water runs from the lance.

Connect to mains power. We recommend to use a RCD device.

OPERATE

Turn on the pressure washer.

Turn the nozzle to the desired spray width and pull the trigger on the spray gun to release a pressured water spray.

Jet spray adjustment is very aggressive. Do not adjust while spraying. Switch the machine off when interrupting your work for extended periods of time.

Special pressure washer detergents can be used to increase the cleaning power of the pressure washer.

Detergent can only be used in combination with the adjustable spray lance in the low pressure setting. Detergent can't be used with turbo lance
